EDUCATION

Delhi Technological University

B.Tech in Computer Engineering (CGPA: 6.34/10)

2022 – 2026

New Delhi, India

Teresa International Academy

CBSE (Class XII) (Percentage: 81.8%)

2021

Patna, India

KV Bailey Road

CBSE (Class X) (Percentage: 93.4%)

2019

Patna, India

EXPERIENCE

Data Science and Machine Learning Intern

Dec 2025 – Feb 2026

YBI Foundation

Gurugram, India

- Performed **exploratory data analysis (EDA)** on **3+ structured datasets (10,000+ records)** to surface actionable business insights, reducing manual data processing time by **40%**.
- Developed end-to-end **ETL pipelines** in Python for data validation, cleaning, and feature engineering spanning **15+ variables**, maintaining **95% data consistency** throughout reporting cycles.
- Trained and benchmarked **5 supervised ML models** to support predictive analytics use cases, improving baseline forecast accuracy by **12%** on real-world test datasets.

PROJECTS

P&L Automation & Margin Analysis Tool | *Python, Pandas, NumPy, Matplotlib, Seaborn*

Kaggle

- Engineered an automated **P&L reporting pipeline** across 4 categories (FMCG, Staples, Pharma, F&V) computing Gross Margin %, EBIT Margin %, and COGS % from raw revenue and cost inputs.
- Developed a **plan vs actual variance engine** to auto-flag monthly shortfalls, paired with a **5-chart dashboard** (margin trend, category mix, variance waterfall, heatmap) for stakeholder reporting.

Inventory Intelligence Dashboard | *Python, Pandas, NumPy, Matplotlib, Seaborn*

Kaggle

- Automated an **inventory ledger** tracking Opening Stock, Inward, Sales, and Closing Stock for **5 SKUs** spanning **3 warehouses**, with weighted-average cost valuation and COGS computation.
- Designed a **demand vs supply variance module** with shrinkage tracking and a **6-chart operational dashboard** surfacing stockout risks and monthly plan deviations over 180 ledger records.

Data Analytics & Predictive Modeling | *Python, Pandas, Scikit-learn, Matplotlib*

GitHub

- Conducted **statistical EDA** on **7+ datasets** with automated preprocessing pipelines (null handling, outlier detection, feature scaling) cutting preparation effort by **40%**.
- Evaluated and optimized **5+ predictive models** achieving **85.8% accuracy**, translating outputs into business-interpretable performance metrics for review.

TECHNICAL SKILLS

Analysis & Reporting: Python (Pandas, NumPy, Scikit-learn), SQL (MySQL, PostgreSQL)

Visualization & Tools: Matplotlib, Seaborn, Power BI, Excel (Pivot Tables, VLOOKUP, Charts), Google Sheets, Jupyter Notebook, Kaggle, Git

Concepts & Coursework: Regression, Classification, Statistical Analysis, DBMS, OOP, Operating Systems, Computer Networks, DSA

ACHIEVEMENTS

- Launched **2 end-to-end analytics projects** on Kaggle covering P&L automation and inventory intelligence, with inline charts and stakeholder-ready outputs.
- Avid reader of business and financial content; consistently develops domain knowledge in supply chain operations, financial reporting, and data-driven decision-making.
