LeetCode

EDUCATION

Delhi Technological University

B.Tech in Computer Engineering (CGPA: 6.34/10)

2022 – 2026

New Delhi, India

Teresa International Academy

CBSE (Class XII) (Percentage: 81.8%)

2021

Patna, India

KV Bailey Road

CBSE (Class X) (Percentage: 93.4%)

2019

Patna, India

EXPERIENCE

Data Science and Machine Learning Intern

Dec 2025 - Feb 2026

YBI Foundation

Gurugram, India

- Analyzed **3+ structured datasets (over 10,000 records)** using Python to generate insights, reducing manual data processing time by **40%**.
- Built supervised learning pipelines with **95% data consistency**, automating preprocessing, feature engineering (15+ features), and evaluation.
- Trained and benchmarked **5 distinct ML models**, improving baseline prediction accuracy by **12%** on real-world test data.

PROJECTS

Music Trends Dashboard | React 18, Redux Toolkit, REST API, Tailwind

GitHub

- Developed a real-time visualization platform integrating **5+ Apple Music API endpoints** to track top global trends across **10+ regions**.
- Implemented Redux Toolkit for state management, reducing unnecessary component re-renders by **40%** and optimizing data flow.
- Designed a responsive UI with Tailwind CSS, achieving a **95+ Google Lighthouse score** for accessibility and mobile performance.

Employee Management System | Java, Spring Boot, MySQL, Maven, React

GitHub

- Architected a full-stack Spring Boot & React app to automate tracking for 500+ employee records, reducing manual workload by 40%.
- Optimized MySQL schemas and indexed queries for 10,000+ entries, improving data retrieval speed by 35% while maintaining 100% ACID compliance.
- Developed 15+ secure RESTful APIs to handle asynchronous operations, achieving sub-200ms response times for seamless user interaction.

Deep Learning & Data Analytics | Python, Pandas, Scikit-learn, Matplotlib

GitHub

- Conducted EDA on 7+ high-dimensional datasets (including MNIST & CIFAR-10) to uncover statistical insights that directly optimized custom CNN and LSTM architectures.
- Engineered automated ETL pipelines in Python to clean raw data, reducing processing time for modeling by 40%.
- Developed Neural Network models (CNN, Seq2Seq) achieving 85.8% accuracy, utilizing hyperparameter tuning across 3 distinct optimizers (Adam, SGD, RMSprop).

TECHNICAL SKILLS

Data Analytics: SQL (MySQL, PostgreSQL), Python (Pandas, NumPy, Scikit-learn), EDA, ETL, Power BI

Software Development: Java (Spring Boot), C++, JavaScript (React.js, Redux), HTML5/CSS3, Tailwind, RESTful APIs, JPA/Hibernate

Tools & Fundamentals: Git, Maven, Postman, VS Code, Jupyter, DSA, DBMS, OOP, Operating Systems, System Design

ACHIEVEMENTS

- Solved 600+ problems on Data Structures and Algorithms.
- Avid reader of web novels; actively engages in reading to enhance creative imagination and strengthen linguistic vocabulary
